## CORE COMPETENCIES

CSST	Equipment Maintenance	Excavation
CSSS	Quality Assurance	Shoring
Safety Audits	Employee Supervision	TWIC
Safety Inspector	PPE	Rigging
Midstream	KPI's	Hot Work
Downstream	Petrochemical	Confined Space
Refinery	NGL Fractionation	OSHA
Industrial	Polymers	Bilingual
Incident Investigations	Turnaround	First Aid/CPR
Project Manager	Coordinator	Safety Culture
EPC	Client Management	Compliance Management
Root Cause Analysis	Field Audits	Oil & Gas

## CONTRACT CAREER SUMMARY

### S&B Engineers & Constructors | Sweeny, TX

January 2019 to Present

#### Safety Inspector

**Project: Phillips 66 SHP2 - Major Projects**

**Project: ETP / Sunoco – Nederland, TX (March – Nov 2020)**

#### Butane Chiller Expansion Project

S&B is one of the leading EPC firms in the USA. We have built many types of projects, but our primary focus is on NGL fractionation, refining, petrochemicals & polymers and export terminals.

- Collaborated with **2,000 - 2,500** employees, in various departments, on this large-scale project to ensure construction was completed with the highest quality and as safe as possible.
- Conduct field safety audits to identify areas of potential risk, safety hazard or other issues.
- Lead incident investigations to identify recurring themes in safety incidents and implement solutions to change overall jobsite behavior and safety culture.
- Collaborate with safety department representatives to ensure best practices are implemented and routinely reviewed.
- Evaluate worksite environments to ensure compliance and reduce potential toxic/hazardous exposures.
- Actively participate in and promote the STA program and POP program.
- Communicate with contractors to discuss expectation and project safety plans/requirements.
- Manage data collection and analysis on safety incidents and near misses.
- Perform root cause analysis and construct corrective actions.
- Participate in the sourcing of new safety products, ensuring consistency and financial prudence.
- Successfully completed a butane chiller expansion in Nederland, TX for Sunoco.
- Worked in live unit, completed tie-ins to new construction.

### Houston Controls | Houston, TX

2016 to 2018

#### Site Safety

**Project: Lyondell Houston Refining - FCC Turnaround / Maintenance**

- Supervised the safety department, responsible for management of equipment maintenance and implementing the company's environmental health and safety program.
- Managed employees on jobsites while implementing compliance of all safety procedures and protocols throughout the plant.
- Verified and monitored quality assurance by conducting daily field safety audits with follow up reports on safety interventions, lessons learned, potential new initiatives to improve safety issues, and identifying gaps in training processes.

- Actively participated in safety meetings, as well as completed and submitted safety reports based on daily audits designed to address issues on the same day issues occurred.
- Reviewed current processes and identified areas of improvement to reduce incidents as much as possible.
- Mitigated risks on jobsites by reviewing upcoming jobs to conduct risk assessments for potential areas of unsafe working conditions and implement specific tailored safety protocols prior to project start date.
- Coordinated and conducted daily safety briefings, with all departments, followed up with remarks at the close of business to discuss potential safety hazards, issues and risks.
- Maintained a daily active presence in field throughout the workday while tracking corrective actions and monitoring trends in results of activities and coaching events.
- Provided direct feedback to clients on issues/trends related to safety performance.
- Followed the guidance on handling, inspection, cleaning and preventative maintenance guidelines for all rescue equipment to provide a constant state of readiness.

### **S&B Engineers & Constructors**

**2015 to 2016**

#### **Safety Inspector**

**Project: Phillips 66 - Major Projects - Frac 1 & EPU**

**Targa / Chevron - USGC Ethylene / Ethane Expansion**

- Collaborated with **2,000 - 2,500** employees, in various departments, on this large-scale project to ensure construction was completed with the highest quality and as safe as possible.
- Completed and submitted incident reports, conducted safety meetings; perform new hire orientation and update personnel on safety policy and procedure.
- Implemented health, safety and environmental policies, procedures and guidelines for all department, reported to upper level management.
- Consistently meet and/or exceed customer expectations all on sites/projects.
- Conducted safety audits while working directly with the clients to assist in incident prevention, hazard recognition and proactive coaching for all employees.
- Tracked (KPI's) Key Performance Indicators extracted from safety audits and identified areas of improvement and highlighted areas where performance was exceptional.
- Reported and remediated all safety indiscretions; Placed a job on Stand-Down to immediately stop the project and identify an area of safety concern, rectify the situation before project continued.
- Created incident reports with appropriate follow up corrective action plans.
- Determined requisites and organized audits of company operated properties.
- Assisted in the development and implementation of systems and standards to facilitate the capturing and analysis of HSE statistics.

### **DeJean Construction Company, Inc.**

**2015**

#### **Safety Manager**

**Project: Celanese / Clariant - Pasadena, TX**

- Successfully managed the safety functions for a **150 to 170-person** field team (iron workers, electricians, pipe crews, safety technicians, etc.).
- Created and submitted incident reports, conducted daily safety meetings, completed new hire orientations and updated personnel on safety policies and procedures.
- Addressed any concerns to upper management to ensure projects were completed with a "safety first" mindset.
- Promoted safe working conditions on assignments that were being carried out by the field workers by issuing daily field permits including but not limited to Hot Work and Confined Space requirements.
- Conducted a Root Cause Analysis for any incident regardless of size.
- Supported the process of continuous improvement initiatives to drive efficiencies, reduce cost and increase customer satisfaction.

### **Apache Industrial Services**

**2014 to 2015**

#### **Safety Manager**

**Projects: OneOK Partners project in Mount Belvieu, TX**

- Managed daily safety functions for **200** craftsmen onsite.
- Reported all (if any) incidents, kept OSHA requirements updated, conducted daily safety meetings and met with clients.
- Performed Root Cause Analysis for every incident regardless of size.
- Performed inspections to ensure conformity in all areas of HSE.
- Interacted with services personnel, clients, subcontractors, and various departments.
